

Fluid Replenishment Cart TC-FRC-100

Model: TC-FRC-100

PRODUCT OVERVIEW

Used for constant-pressure liquid replenishment of liquid cooling cabinet systems, or for refilling make-up tanks and other vessels that need fluid supplementation.

KEY FEATURES

- Easy, efficient liquid replenishment
- Large-capacity tank supports multiple refilling cycles
- Flow switch for high reliability
- Supports long-distance replenishment
- Strong caster-wheel base
- Clean, simple operation interface
- Suitable for high-flow rapid filling and ultra-low-flow daily make-up

PRODUCT SPECIFICATIONS

Item	Specification
Power Supply	220 VAC / 1 Ph / 50–60 Hz standard · 230 V to order
Rated Current	2.6 A
Max Power	450 W
Reserved Cable Length	≥ 10 m
Power Connection	IEC C13 inlet · local plug (e.g. AS/NZS 3112) to order
Rated Tank Capacity	100 L
Max Liquid Reflow Flow Rate	≥ 50 L/min
Working Fluid	Propylene glycol solution / ethylene glycol solution / water with additives
Filter Screen Precision	100 mesh

APPLICATIONS

- Liquid Cooling Commissioning
- Routine Make-up
- Maintenance
